UK mobile technology firm Mobiqa has teamed up with online service M-Ticket to offer an M-Ticket service aimed at the customers of UK provider of online airport booking Lounge Pass. Lounge Pass tickets are delivered instantly to customers' mobile phones after they purchase exclusive VIP Lounge Pass tickets at loungepass.com or through travel agents. Thanks to the M-Ticket service, passengers that book a VIP lounge through Lounge Pass receive a barcoded ticket directly on their mobile phone. The M-Ticket is delivered directly to the customer's mobile phone in the form of an SMS. An M-Ticket contains a unique 2D barcode message which is scanned at reception desks before embarkation, as well as information about the seat.
